FOAM BRUSH SYSTEMS

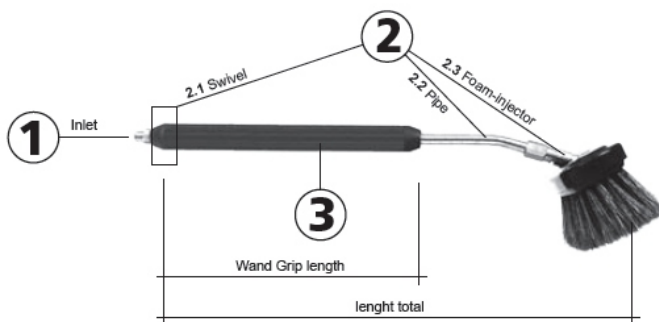

Why Choose a Foam Brush System

- ◆ Applying foam instead of liquid cleaning chemicals allows the chemicals to stay on the surface longer, making them more effective.
- ◆ Foam brushes apply cleaning chemicals at the same time as providing the agitation necessary for effective cleaning.

Foaming Single G57 Applicator Pump Station

- ◆ Includes (1) Flojet G57 Pump
- ◆ Aluminum wall-mount rack
- ◆ Air regulator & pressure gauge
- ◆ Solenoid - 24v or 110v.
- ◆ Air pressure can be set from 0 to 100psi
- ◆ Internally designed for automatic on/off to maintain set pressure in outgoing solution lines
- ◆ No need for a pressurized tank & pressure switch
- ◆ Can feed up to 2 Foam Brushes at a time
- ◆ Great for pumping tire chemical, mag wheel solution, etc.
- ◆ Also ideal for self-service bays for pre-soak, foaming brush, etc

Foam Brushes are used in wash bays and in industrial applications. The brush head is made of stainless steel, non-marking rubber trim and comes standard with high quality hogs hair bristles. Hog's hair is nature's most durable hair. This soft yet strong hair is more durable than camel hair and sheds less than horse hair. Hog's hair is naturally thick and sturdy and it holds a tremendous amount of water. All foam brushes are available with integrated swivel option.

Option: Wand / Foam Brush Conversion
