

SS MOBILE WASH SKID

SS SERIES: DIESEL HEATED, GAS OR DIESEL ENGINE

THE RIGHT CLEANING POWER, RIGHT WHERE YOU NEED IT!

HYDROMTEK.US

MOBILE WASH SKID

HOT/COLD/STEAM - GAS or DIESEL ENGINE: with 12-volt diesel burner

SS
SERIES

■ **Rugged “Pro-TECT-it” Frame:**

Hydro Tek’s unique “Pro-TECT-it” frame of 1¼”, heavy gauge steel, with durable electrostatically applied powder coat finish. The built-in lifting bars gives you greater flexibility and protection when moving the system.

□ **Stainless Steel Panels:**

These rugged and durable panels offer lifetime rust and corrosion resistance and protection of your valuable investment from the harshest environments. Keeps your machine looking like new for years to come.

□ **Simple to Use Controls:**

Lighted rocker switch, thermostat and other controls are located on an easy to reach recessed panel to prevent damage.

■ **Industrial Engines:**

Efficient OHV gas engines with electric key start, low oil shutdown, and cast iron cylinder for maximum duty and performance. Some models equipped with a durable diesel engine for enhanced longevity and efficient operation.

■ **Fuel Tanks:**

Heavy Duty “roto-molded” rust free fuel tanks with fuel filter to protect against contaminated fuel. Extended run time (up to 8hrs.) eliminates interruptions.

■ **Panel Mounted Unloader:**

The unloader is frame mounted eliminating heat failures and vibration. Low flow models have pressure activated unloaders for consistent and dependable operation. Higher flow models have flow activated unloaders which allow pressure to build up gradually as trigger gun is activated eliminating “pressure spikes” and improving operator control and safety. When the gun is released, entire system pressure is relieved enhancing life of washer and eliminating engine starting problems.

■ **Heating System:**

The Ultimate balance of power, efficiency and corrosion resistance in this uniquely designed Hydro Tek schedule 80 coil. Rugged construction suitable for “over the road use” works in harmony with the double wall stainless steel, ceramic insulated housing. Virtually indestructible construction and industry leading performance — years of uninterrupted, worry free service.

■ **Flexible, high intensity 12V Diesel Burner System:**

Sophisticated 12V burner system transforms available power from system to fire the diesel burner. This efficient burner system offers an economical alternative to provide maximum burner performance. No outside power source is required. (See SC Series for additional 12V skids)

■ **Compact Design:**

Engineered for versatility and portability. Skid with wheels can easily fit through 30” spaces and doors.

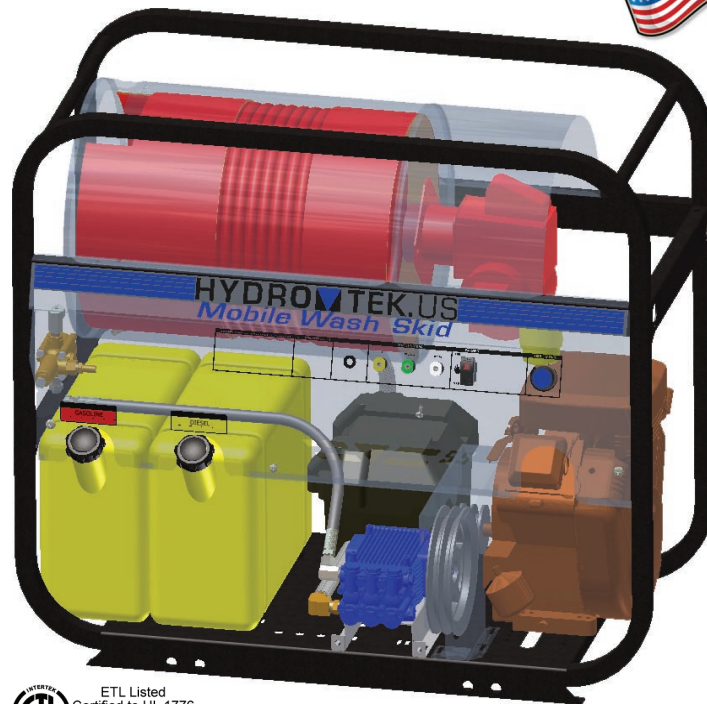

■ **Belt Drive or Direct Drive Pump:**

These industrial triplex, ceramic plunger pumps are run at lower RPM to give maximum efficiency and longevity outperforming the competition. Pumps are located front and center for easy access.

■ **More Standard Features:**

- Burst disc technology for operator safety
- Adjustable temperature up to 250°F with steam setting
- Heavy duty, 50’ high pressure hose
- Quick release nozzles

Additional features for SS35004VH: Flow activated burner delivers a hot water, low pressure rinse. Extra air band capacity for high altitude rating.

* Pull start engine

+ Hour meter, inlet injection and float tank included and standard (Refer to SC Series for a few additional 12v skids)

Specifications may vary, consult factory for custom models.

Optional Accessories...

Hour meter, Soap injection kit, Winterizing kit, Custom skid color, Turbo nozzle, Hydro Twister-concrete cleaner, Wet sandblast assembly, Hose and wand extensions, Wheel kits, Stainless hose reels, Machine covers, trailers and tank skids, 12v AGM sealed battery

Wheel kit options available
